

DuploFLEX® FOL

The plate mounting tape solution for the most sophisticated tasks in letter press printing.

Increasingly difficult printing jobs mean that plate mounting adhesive tapes also have to adapt accordingly. Only then can the higher quality requirements made to the printed image be met.

This sophisticated need can only be fulfilled by exactly adjusted degrees of compressibility of the base. The DuploFLEX® FOL range is a open variant for the spectrum of flexographic printing.

Adhesives:

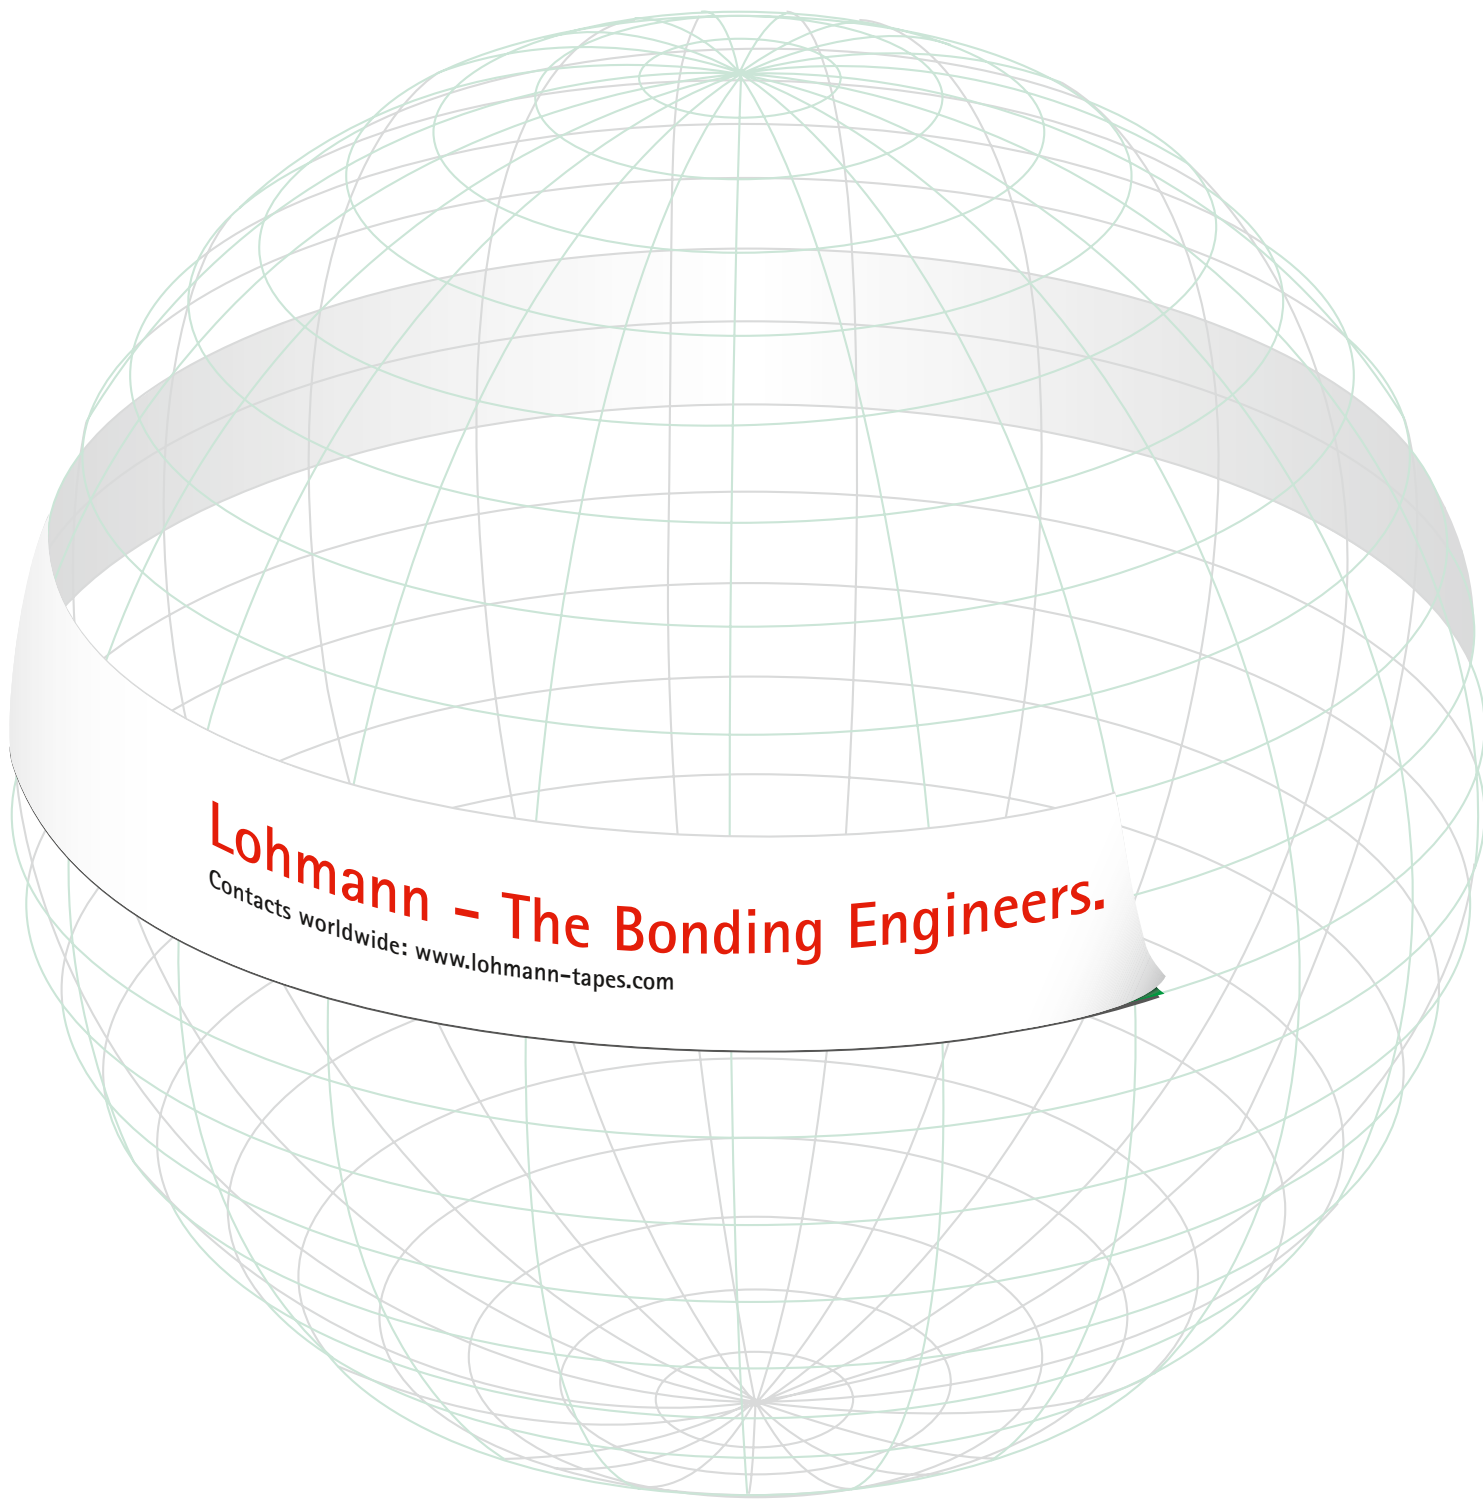

- optimised for highest efficiency in mounting, printing and demounting
- high resistance against traditionally used solvents and cleaning agents

Film Liner:

- high distortion resistance avoids overexpansion of the adhesive tape
- smooth, slippery surface allows manual rubbing down of the adhesive tape on the cylinder
- the orange skin structure in the adhesive surface helps avoiding air bubble entrapment between adhesive tape and printing plate

DuploFLEX® FOL film carrier tapes

Foam thickness		Adhesive	PVC-film	Liner
0.10 mm		DuploFLEX® FOL 010	colourless-transparent	PVC creped film
0.15 mm		DuploFLEX® FOL 015	yellow-transparent	
0.20 mm		DuploFLEX® FOL 020	green-transparent	
0.25 mm		DuploFLEX® FOL 025	red-transparent	
0.30 mm		DuploFLEX® FOL 030	blue-transparent
